

### **Commentary on the book**

Introduction and implementation of scientific music conducting techniques is one of the useful and necessary measures in music atmosphere of the country.

Because scientific debates of music is not limited to the Western classical music. In fact a significant artistic achievements and process portion have relevance in our national music. It also enhances the understanding and cleverness of the students. A good music writer shall have a good technical and scientific knowledge of music that shall complement with his/her talent and interest in music. This allows the works to be encompassed in different cultural and artistic aspects.

The present book includes some of the artistic works of Mr. Anoosh Jahanshahi that have been written and performed based on several important forms and fundamental techniques. This was the first in its kind in Iran and could be used for familiarization of the youngs with these techniques. In particular they could have a better utilization and effective connection via the Compacted Disc (CD).

Mr. Anoosh Jahanshahi is one of the most competent and hard working artists in this field who has many valuable artistic works such as books , music albums and articles . I wish all be best and prosperity for him and may we have a part in progress of music in our country.
